Summary

Innovative and solution-driven **developer** with a passion for building impactful web and mobile applications. Skilled at turning complex problems into practical tools that improve user experience, streamline operations, and support community-focused initiatives. Committed to creating scalable, meaningful solutions that deliver real value.

Experience

Solutions Developed
Developer

- **Profit & Cost Simulation Web App**
  Developed a web-based simulator to assist sellers in calculating profit and costs across different stages of the sales process—lead generation, confirmation, and delivery.
- **Offline Mobile App for Cooperative Associations**
  Built a mobile application for a local association supporting cooperatives. The app collects data offline, analyzes it, and provides actionable recommendations to improve cooperative performance.
- **E-commerce Web App with Geo-IP Currency Conversion**
  Created a web application for an e-commerce store that tracks user IP addresses and dynamically converts product prices to the visitor's local currency, improving user experience and conversion rates.

Storeino | Agadir
Full Stack Developer | 10/2024 - 04/2025

- Engineered and implemented comprehensive **themes and applications** using **Vue.js and Tailwind** CSS for the company's flagship platforms (Atlas and Prestige), ensuring a modern and responsive design. Spearheaded the integration of custom themes into existing applications, maintaining a seamless user interface and upholding design consistency across platforms.
- developed scalable **RESTful APIs** to optimize application performance, enhance functionality, and deliver an exceptional user experience.
- Developed full-stack projects utilizing **React.js, React Native,Node.js, Express.js, and MongoDB,** delivering end-to-end solutions with robust backend systems and intuitive frontend interfaces.

-

Geoap
Internship | 08/2024 - 10/2024

- During my internship at Geoap, I developed a complete **backend API** for the Geoap Academy platform using **Node.js, Express.js,** and MongoDB
  (with Mongo Atlas for data storage). I implemented full authentication and authorization systems, ensuring secure access and data integrity.
  Throughout the project, I focused on writing **clean, maintainable code** and adhering to best practices for scalability and performance.

PFE
Cabinet Medical website(PFE)
Developed with React.js for the frontend and Node.js, Express.js for the backend, using MongoDB for database management. Worked in a team to enhance frontend and backend skills and contributed significantly.

Skills

Javascript, CSS, Html5, APIS, Express.js, Node.js, Laravel , SQL, MongoDB, GIT, Software development, Unit Testing, AWS

Education

University of Ibn Zohr | Agadir
